IFRS 17 Implementation Guide

Insurance contracts — a practitioner's walkthrough

Demo material for the Help Center — not real guidance.

1. Scope and contract boundaries

This document summarises the approach the firm takes and the decisions an engagement team needs to make. It is written for practitioners and assumes familiarity with the underlying standard.

Each section sets out the requirement, the practical steps, and the evidence a reviewer will expect to see on file. Where judgement is needed, the factors to weigh are listed with worked examples.

Teams should agree the plan with the engagement lead before fieldwork starts, record key decisions as they are made, and raise questions early with the technical desk.

Common pitfalls are highlighted at the end of each section, together with the reviewer's checklist.

2. Measurement models

This document summarises the approach the firm takes and the decisions an engagement team needs to make. It is written for practitioners and assumes familiarity with the underlying standard.

Each section sets out the requirement, the practical steps, and the evidence a reviewer will expect to see on file. Where judgement is needed, the factors to weigh are listed with worked examples.

Teams should agree the plan with the engagement lead before fieldwork starts, record key decisions as they are made, and raise questions early with the technical desk.

Common pitfalls are highlighted at the end of each section, together with the reviewer's checklist.

3. Transition approaches

This document summarises the approach the firm takes and the decisions an engagement team needs to make. It is written for practitioners and assumes familiarity with the underlying standard.

Each section sets out the requirement, the practical steps, and the evidence a reviewer will expect to see on file. Where judgement is needed, the factors to weigh are listed with worked examples.

Teams should agree the plan with the engagement lead before fieldwork starts, record key decisions as they are made, and raise questions early with the technical desk.

Common pitfalls are highlighted at the end of each section, together with the reviewer's checklist.

4. Disclosures

This document summarises the approach the firm takes and the decisions an engagement team needs to make. It is written for practitioners and assumes familiarity with the underlying standard.

Each section sets out the requirement, the practical steps, and the evidence a reviewer will expect to see on file. Where judgement is needed, the factors to weigh are listed with worked examples.

Teams should agree the plan with the engagement lead before fieldwork starts, record key decisions as they are made, and raise questions early with the technical desk.

Common pitfalls are highlighted at the end of each section, together with the reviewer's checklist.

5. Audit considerations

This document summarises the approach the firm takes and the decisions an engagement team needs to make. It is written for practitioners and assumes familiarity with the underlying standard.

Each section sets out the requirement, the practical steps, and the evidence a reviewer will expect to see on file. Where judgement is needed, the factors to weigh are listed with worked examples.

Teams should agree the plan with the engagement lead before fieldwork starts, record key decisions as they are made, and raise questions early with the technical desk.

Common pitfalls are highlighted at the end of each section, together with the reviewer's checklist.

6. Checklist

This document summarises the approach the firm takes and the decisions an engagement team needs to make. It is written for practitioners and assumes familiarity with the underlying standard.

Each section sets out the requirement, the practical steps, and the evidence a reviewer will expect to see on file. Where judgement is needed, the factors to weigh are listed with worked examples.

Teams should agree the plan with the engagement lead before fieldwork starts, record key decisions as they are made, and raise questions early with the technical desk.

Common pitfalls are highlighted at the end of each section, together with the reviewer's checklist.
